(54) Title: FAILURE SENSING DEVICE OF VEHICLE CONTROL SYSTEM

(57) Abstract: A vehicle control system is configured by basic control units of a power train control unit (100), a steering control unit (110) and a brake control unit (120) that are arranged in a lower control hierarchy level, a vehicle motion control manager unit (200) that is arranged in a middle control hierarchy level, and a driving support control unit (300) that is arranged in an upper control hierarchy level. The basic control units transmits input data to vehicle motion control manager unit (200) of middle control hierarchy level and/or driving support control unit (300) of upper control hierarchy level, and receives a calculation result of the input data substituted into a predetermined calculation formula at vehicle motion control manager unit (200) and/or driving support control unit (300). If the input data and the calculation result data are not consistent, it determines that there is a failure in vehicle motion control manager unit (200) and/or driving support control unit (300).

# INTERNATIONAL SEARCH REPORT

Inter nal Application No  
PCT/JP2005/000163

A. CLASSIFICATION OF SUBJECT MATTER  
IPC 7 B60R16/02 G05B23/02

According to International Patent Classification (IPC) or to both national classification and IPC

## B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC 7 B60R G05B

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, WPI Data, PAJ

## C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X A	US 2003/023407 A1 (LOEHR DIETHARD ET AL) 30 January 2003 (2003-01-30) paragraph '0009! - paragraph '0038!; figures	1-4, 9-13, 18 5-8, 14-17
A	US 2003/009271 A1 (AKIYAMA SUSUMU) 9 January 2003 (2003-01-09) paragraph '0018! - paragraph '0023!; figures	1, 10
A	& JP 2003 019931 A (DENSO CORP) 21 January 2003 (2003-01-21) cited in the application	
A	US 5 957 985 A (WONG ET AL) 28 September 1999 (1999-09-28) column 2, line 18 - column 3, line 14; figures	1, 10

☒ Further documents are listed in the continuation of box C.

☒ Patent family members are listed in annex.

### \* Special categories of cited documents :

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier document but published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

- "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- "&" document member of the same patent family

Date of the actual completion of the international search
